# ANALOGUE MUSCLE TESTING

Course ID: 74

Prerequisite: Minimum level - Foundation Level / Touch for Health / Balanced Health

Developed by the late Alan Sales, this system of muscle testing determines the ultimate treatment for your clients.

**"I have been using analogue muscle testing for the last 11 years and consider it the most exciting development we've had in kinesiology for a number of years. This is so powerful all our practitioner – level students since 2005 have used analogue testing" Terry Larder**

Testing muscle response gives us a binary feedback (it's either on or off). Not any more.... Learn how you can pick up and address so much more using analogue testing.

Simple to learn yet very effective - don't miss this new dimension to add to your skills and you will achieve even deeper corrections for your clients.

You will learn:

- How to muscle test in analogue mode which reveals more imbalances than ever before
- How to identify the best healing procedure from your 'toolbox'
- How to load all the information the body wants to use without the tedious need to stack
- If you wish to stack, using analogue testing is much easier than in binary where you are coping with multiple changes of indicator

*A recent course participant, very experienced in kinesiology, emailed us saying "This course has totally changed the way I work". Another said "I'm astounded at how much quicker I can get to the root of a person's problem and how much more I can get done during the appointment. My results with clients are better than ever!"*

**Venue: CKI Leicester**

**Duration: 1 day**

**Next Course: Saturday 21<sup>st</sup> October 2017**

**Cost: £125**

# DEEP LEVEL CHAKRA BALANCING

Course ID: 75

Prerequisite: Minimum level - intermediate kinesiology

This practical down to earth course gives a new dimension to an esoteric subject. Terry Larder examines the relationship of the chakras to the physiology of the body. She will show you how treating the acupuncture system - the distributors of energy - will fine tune these highly important 'transponders' of energy to affect in a remarkable way the body, mind and spirit.

Using this non-invasive treatment:

- You will experience stunning results you're your patients
- Be able to relieve pain and discomfort in any area of the body
- Relax tight muscles and joints and move bones without force
- As the chakras are greatly affected by stress, you will be able to diffuse even severe emotional problems in a simple non- threatening way.
- When your usual mode of treatment has no effect, treating the chakras can remove blocks that prevent healing.

"This is the work of Richard Utt. When I originally trained with him in Sweden, I was very sceptical about chakras – or whether they really existed! The day after I got back I was determined to try this out in my clinic straight away. With disbelief, I used it on most of my clients that day. On their return I really was stunned. One man, who was being bullied at work was in a dilemma whether to retire, came back and said, he'd calmly given in his notice the next day. One gentleman with chronic back pain reported that it had never been so good despite all the manipulation he'd had done previously. Since then I've used this little system daily in clinic interweaved with the other things I know and love." - Terry Larder

**Venue: CKI Leicester**

**Duration: 3 days**

**Dates: Friday 27<sup>th</sup> – Sunday 29<sup>th</sup> October 2017 Cost: £345 including equipment**

# LATERAL THINKING SKILLS FOR THE KINESIOLOGIST

Course ID: 77

Prerequisite: Kinesiology at certificate level and above

This one-day CPD course will suit:

- Those who feel there could be knowledge gaps in physiology, nutrition and naturopathy.
- Anyone who would like to gain more knowledge in how to nail down underlying health problems and need some different solutions in how to achieve this.
- Newly qualified kinesiologists

This fascinating day course will be a mixture of:

- Applying lateral thinking about a case by looking at the physiology and tracking down possible underlying causes of specific common illnesses.
- Kinesiology techniques and strategies to address these issues
- Clinical pearls that make a difference

**You will go home buzzing with all sorts of new ideas to try out with your clients!**

**Venue: CKI Leicester**

**Duration 1 Day**

**Date: Saturday 2<sup>nd</sup> December 2017**

**Cost: £115**
